

Skraffino

Concrete Microtopping Flooring System

düraamen
engineered to perform

Modern Flooring with Style.

Modernize your interior spaces with the contemporary look of natural polished concrete.

It's easy to give nearly any interior surface a complete face-lift with Duraamen's Skraffino decorative concrete overlays. Skraffino has the look of a natural hand-applied polished concrete surface and can be applied over various substrates like concrete, gypsum, or any hard-wearing surface.

If a natural concrete finish isn't appealing, you may choose from an abundance of subdued or vibrant hues. Homeowners and interior designers will love the more than sixty available color options and gloss, satin, or matte finishes. Additionally, your installer can create an infinite range of custom hues through color-mixing.

Versatility

Skraffino can be used on horizontal and vertical surfaces, making it perfect for stylish staircases, walls, and floors. Create the contemporary interior design featured in art galleries, luxury building lobbies, and high-end retail stores. Skraffino turns a dated looking office space, home, condominium, or loft into a work of modern art.

Features

Skraffino concrete overlays have several advantages over other types of flooring.

Abrasion resistant

Anti-slip coating

VOC Compliant / low order

UV Resistant

Skraffino Floor System

Value

Skraffino is a great value! Convert aged, worn, and damaged concrete surfaces into contemporary, one-of-kind, polished concrete floors at significantly less cost than other types of traditional floor coverings. Skraffino is incredibly low-maintenance and often lasts for the life of the property.
